

## Message

USA is the oldest democracy of the world. India is the largest democracy on the earth. Moreover, both the countries remain committed to these principles. The democratic ideals flow from the ideals of humanity. The challenges of today's world require us to work together even more seriously. We have to strengthen the processes of democracy with the aim of larger good of the larger number of people. Mahatma Gandhi has been and is the biggest light house in this journey.

Gujarat, the land of Mahatma Gandhi, believes in these principles even more earnestly. It has been at the forefront of nurturing such ideals and leading its people to grow on this very path. Particularly, in recent years, Gujarat State has adopted inclusive and environment friendly process of development. Gujarat is ready to work with the rest of the world to make further impact in these fields.

Gujarat has been a global community. Our people have learnt a lot and have received lot of love and affection across the globe. We are keen to return the same love and affection to the world. This creates a common platform for creative forces. I am sure that organizations like the National Indian American Coalition (Neeyak) under the leadership of Mr. Shalabh Kumar can help us greatly in this process. Let us come together and work together to make the life of our people better.

Narendra Modi

Chief Minister, Gujarat State
